ABDUL ARHAM

Software Engineer

House 88, Street 10, Phase VI, Bahria Town, Islamabad ◇ abdul.arham9123@gmail.com ◇ (+92) 317-5271509 ◇ arham-react-website.vercel.app

Profile

Driven Software Engineer adept at architecting scalable solutions and leveraging data-driven insights. Proficient in full-stack web development with expertise in JavaScript, RESTful API design, Python programming, and PostgreSQL database management. Committed to continuous learning and rapidly integrating emerging technologies to deliver robust, high-quality software.

Skills

- Full-Stack Web Dev
- Databases
- DevOps
- System Design
- Cloud Development
- Mobile App Development

Technologies & Frameworks

- JavaScript
- React Native
- Material UI
- Next.js
- Python
- Flutter
- AWS
- Tailwind CSS
- MERN Stack
- PostgreSQL
- MongoDB
- MySQL

Professional Experience

Software Engineer, Recce **Mar 2025 - Present**

- Recce is a movie discovery and review platform that enables users to share their opinions, explore reviews, and make informed decisions about what to watch next.
- Contributed to the development, maintenance, and continuous improvement of the Recce platform.
- Collaborated closely with cross-functional team members to deliver a product aligned with user needs and expectations.
- Worked across multiple areas of the product, including web development, mobile application development, and DevOps.
- Contributed to building and maintaining the platform's infrastructure and ensuring a reliable user experience.

Associate Software Engineer, Stax3 **Jun 2025 - Apr 2026**

- Contributed to the development of software products at Stax3, a software development company delivering technology solutions and services to clients worldwide.

- Contributed to the development of a web-based platform that enables users to build and deploy AI-powered chatbot agents for their websites.
- Worked on the maintenance, enhancement, and ongoing development of a no-code gaming platform, ensuring its continued functionality and reliability.

MERN Stack Web Developer (Freelancer), Upwork **Aug 2023 - May 2025**

- Development of a MERN Stack sales automation platform, streamlining lead capture and order processing workflows.
- Engineered an AI-driven chatbot using the OpenAI API and backend built in Flask (Python).
- Maintained a flawless on-time delivery record by rigorously aligning project milestones with client objectives, ensuring high satisfaction and repeat business.

Software Engineer Intern, One Byte **Jul 2023 - Aug 2023**

- Enabled alerts on an Elasticsearch cluster for patient health monitoring.
- Developed robust RESTful Express.js APIs backed by PostgreSQL, including database schema design, connection pooling, and optimized query performance for high-throughput applications.

Projects

Recce Site
A marketing website

- A marketing website for a movies app
- Build the Website in next.js
- Website content management in strapi
- Hosted the website on aws amplify
- Strapi cms hosted on aws ecs

Emploirapide
React Native Mobile Application

- Job hunting and connecting clients to job seekers
- Built in React Native
- I developed the mobile application and integrated it with the backend.

Bakery Management System
MERN-stack web app for:

- Product management, orders, and two-factor user auth.
- Admin panel for system oversight.
- Efficient data handling and storage.

Education

Bachelor of Engineering in Software Engineering, NUST, Islamabad
Nov 2021 – May 2025
Relevant coursework: Programming, Databases, Software Engineering, Web Engineering, Machine Learning.

Languages

Fluent: English, Urdu.
